Definition of a trading bonus: A trading bonus is an added value to your deposit in your trading account with the Company which provides you with more funds in the form of Credit to use when you are trading.

A trading bonus gives you great value and extra trading leverage. With all of the above being mentioned; when you trade with bonus leverage you need to be cautious. It is truly appealing, but there is a downside. You may close higher trades and make more money initially (or in the long run), but you can also lose a lot more money. CFD trading can be risky and you need to trade with confidence and responsibility to avoid losses.
